Introduction & Business Context

- ⚡ **Quick Commerce Ecosystem:** Blinkit (formerly Grofers) delivers daily essential groceries to urban households in under 10 minutes.
- 🏪 **Operational Complexity:** Managing thousands of SKUs across dark stores, location tiers, and fat content segments requires real-time data visibility.
- 📈 **Analytics Purpose:** Transforms raw transactional data into interactive Power BI dashboards to track sales growth and inventory mix.
- 🎯 **Actionable Decisions:** Empowers retail managers to optimize product placement, identify top dark stores, and increase average revenue.

Key Project Objectives

Track Key KPIs

Quantify primary financial and operational metrics, including Total Sales, Average Sales per Order, Total Quantity Sold, and Customer Satisfaction Ratings.

Segment Demand

Analyze consumer preferences across Product Fat Content, Category Types, City Tiers (Tier 1, 2, 3), and Store Sizes to pinpoint core growth drivers.

Optimize Outlets

Evaluate how store establishment year, geographic tier, and footprint size directly impact throughput and sales volume across dark store networks.

Data Source Overview

Attribute Field	Data Type	Description	Sample Values
Item Fat Content	Cat Categorical	Dietary classification of grocery items	Low Fat, Regular
Item Type	Cat Categorical	Product department category	Fruits & Veg, Snacks, Dairy, Frozen
Outlet Establishment	Nu Numerical (Year)	Year the dark store / outlet was launched	1999, 2010, 2018, 2022
Outlet Size & Tier	Cat Categorical	Physical store area size & city tier type	Small, Medium, High Tier 1, 2, 3
Item Sales (\$)	Nu Numerical (\$)	Total gross revenue generated per item	\$142.50, \$210.00, \$85.20

ACTIVE OUTLETS TRACKED

Data Processing Pipeline: Transformed 8,523 transactional records using Power Query. Standardized shorthand entries (e.g., merging 'LF' and 'low fat' into 'Low Fat') to ensure clean data architecture and seamless calculations.

SECTION 02

Sales Insights & Analysis

Detailed breakdown of category revenue, customer preferences, and store footprint performance.

Category Revenue Performance

Key Finding: Fruits & Vegetables alongside Snack Foods generate nearly **30% of total quick-commerce sales**, demonstrating that daily fresh produce and instant snacks drive high order frequency.

Product Share & Consumer Preference

Low Fat Products (\$776K Revenue)

Dominates consumer order volume across urban centers. Health-conscious choices represent nearly 2/3 of total sales.

Regular Products (\$425K Revenue)

Steady secondary revenue driver, maintaining strong baseline demand in indulgence and snack categories.

Store Size & Location Tier Efficiency

Store Size Analysis

- ✓ **Medium Outlets (42% Share):** Yield the highest efficiency (**\$504K Revenue**) by balancing optimal inventory holding capacity and fulfillment speed.
- ✓ **Small Outlets (33% Share):** Generate **\$396K**, acting as agile dark stores in high-density urban nodes for fast 10-minute turnaround.

Geographic City Tiers

-  **Tier 1 Cities:** Account for the largest volume due to mature digital adoption of 10-minute grocery delivery services.
-  **Tier 2 & 3 Cities:** Present strong growth momentum, with Tier 3 showing higher average basket size per transaction.

Strategic Growth Recommendations

Inventory Mix Optimization: Expand Low-Fat and Fresh Produce stock in Tier 1 dark stores to match surging consumer demand.

Dark Store Expansion: Replicate the Medium Outlet footprint (3,000-5,000 sq.ft.) for maximum capital efficiency and fast delivery radius.

Cross-Selling Bundles: Pair high-margin Snack Foods with Dairy & Vegetables to increase Average Order Value (AOV).

Thank You!
